Lennar's automated homes are built according to the Wi-Fi Alliance® program guidelines for Wi-Fi CERTIFIED™ Home Designs. See the Wi-Fi Alliance website at www.wi-fi.org for additional information regarding the Wi-Fi CERTIFIED Home Design program. The Wi-Fi Alliance also certifies home designs after review of a home floorplan, which may occur after your closing. Wireless performance in homes will vary due to design changes, construction changes, placement of furnishings and appliances, usage, and local conditions. Network performance will be affected by network configuration, the number of users, and the type of use. Homeowners are responsible for providing their own internet connection and determining their own bandwidth needs, which may vary. Lennar does not warrant or represent that any network or network device is secure or can prevent all privacy intrusions, malware, or cyber-attacks, even when correctly configured. Certain products and services are provided by third parties, and not Lennar. Lennar does not guarantee any equipment or services provided by third parties. Additional disclosures and disclaimers relating to The Connected Home program will apply. See your purchase agreement and related disclosures for details. Energy claims were developed by third parties and not based upon specific testing of an individual home. Savings will vary due to many variables, including but not limited to, actual utility rates and fees, actual construction, floor plan, occupancy, appliance usage, thermostat settings, weather conditions, number of individuals occupying the home and orientation of the home.
